

ECOHOME COUNTERTOP BALL PARK ESTIMATE

BALLPARK ESTIMATE AND QUOTE

The Ecohome Improvement no-charge **ballpark estimate** is intended to give you an understanding of the approximate cost of eco countertops for your project size. **The estimate includes template visit, countertop materials, custom fabrication, installation visit, shipping, and even tax for each of our eco countertop lines.** Once you review the ballpark estimate and consult with an Ecohome Associate, you will be able to choose the right material for your lifestyle, design and budget considerations. Moving forward, we will work with our fabricators and generate a firm **quote** for you which includes detailed project costs.

THE ESTIMATE

The actual pricing for your countertop project can vary depending on factors such as multiple sink cut-outs, sink type, range type, backsplash, drain board, raised bar, curved tops, seam placement, color selection, and verification of dimensions. Simply fill out this form and include your cabinetry or architectural plans. We have provided grid paper for those who do not have plans. Please submit this form with your plans:

1. By fax: 510-644-3501
2. By email: alison@ecohomeimprovement.com
3. By visiting our showroom at 2617 San Pablo Ave in Berkeley

Please allow 2-3 business to receive the estimate via email. We will also include a *Quote Worksheet* to assist you in taking the next steps should we have your interest.

CREATE YOUR OWN PLANS

If you have plans, you can skip this step, but please fill out your contact information and product type on the next page. Even at this early stage, clear and accurate drawings are essential to getting your countertop estimate and quotes to you quickly. Please note the following as you prepare your drawings. Grid paper and an example are also attached:

1. Draw the shape of your countertop space.
2. Notate the width and length in inches along the lines.
3. Indicate the location of any required cut-outs (i.e. sinks and ranges).
4. Notate areas where you would like a backsplash by writing the letter 'B' along that length of countertop. (see example next page)
5. Notate finished/exposed edges by writing the letter 'X' along that length of countertop. Islands are assumed to have four finished edges, unless indicated otherwise.
