- 2-3 mo
- Future

Please see details below about what information we need in order to provide you with a ballpark estimate

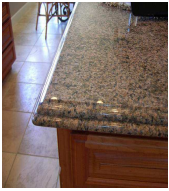

CABINETS

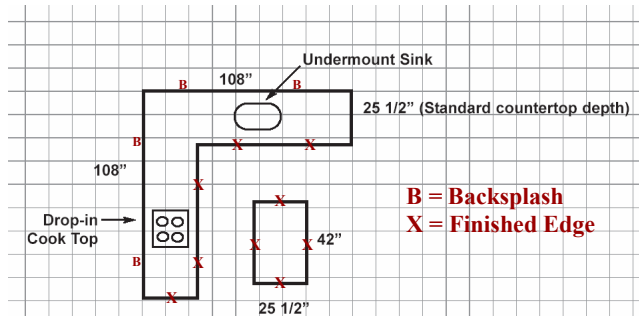

For the cabinetry ballpark estimate, please provide us with your floor plan. To provide you with the most accurate information, please include elevations as well as the dimensions or scaled drawings. Please be sure to notate the location of the uppers (see sample).

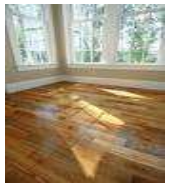

COUNTERTOPS

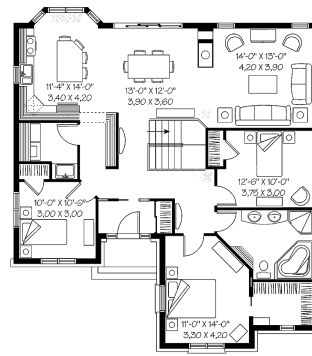

For the countertop ballpark estimate, please provide us with a floor plan that has all of the dimensions notated. Please also indicate where edges are to be finished as well as where you would like back splash in the same material (if any). Don't fret, it does not need to be a scaled or professional drawing. You can just do a simple hand drawing.

FLOORING

For the flooring ballpark estimate, you can either just provide us with the approximate square footage you need if you already have that information. If not, please supply us with floor plan drawings with dimensions indicated of all of the rooms that you are needing flooring for. Please specify what material goes where if you are looking at multiple types of flooring.

TILE

For a tile ballpark please provide us with a sketch that shows your template design, the height and the length of the area to be tiled.
