

1. Appointment

The first step is to make an appointment at Ecohome Improvement for a visit from our installation partner. We send your information to the installer who will then call you to confirm your appointment.

With your installer you will talk about the specifics of your flooring project and learn about options. You will also be left with a labor estimate and an estimate for the amount of flooring to order.

2. Labor Estimate

The installer will provide you with two key numbers:

1. Labor cost to remove existing flooring if necessary, prep the sub-floor and install your new floor.
2. Estimate for the amount of flooring you will need to order.

Please note: This referral is provided to you as a service only. You are not obligated to work with our installation partner to purchase your flooring from us. We are not responsible for the work performed by the installer.

3. Floor Estimate

Ecohome Improvement also receives a copy of your labor and materials estimate. Following, we promptly email you a materials quote along with product specific attachments.

With the labor and materials quote in hand, you now have the total flooring project cost. You can order your flooring directly at our showroom or over the phone.

Showroom & Paint Bar

2619 San Pablo Ave
Berkeley Ca, 94702
510.644.3500

4. Purchase

Your new flooring is purchased through Ecohome Improvement while the labor cost is paid directly to our installation partner. We recommend ordering the floor at least 2 weeks prior to your planned installation date. It is your responsibility to set-up the installation appointment to ensure timely completion of your project.
